## EDUCATION

**West Virginia State University**, Institute, WV May 2028

*Master of Science, Computer Science*

*Relevant Coursework:* Advanced Software Engineering, Analysis of Algorithms

**Jackson State University**, Jackson, MS May 2025

*Bachelor of Science, Computer Science, GPA 3.93*

*Relevant Coursework:* Algorithm Design and Analysis, Operating Systems, Database Systems

## SKILLS

**Programming Languages:** Java, Python, Typescript, JavaScript, SQL, Bash, Kotlin

**Cloud & DevOps:** AWS (Lambda, SQS, SNS, CloudWatch, IoTCore), Docker, Git/GitHub Actions, CI/CD

**Frameworks & Tools:** React, React Native, FastAPI, Express.js, Pandas, Scikit-Learn, Jupyter

**AI & Machine Learning:** LLMs, Prompt Engineering, RAG Pipelines, TensorFlow, Keras

## EXPERIENCE

**Intellibyte Software Solutions**, Memphis, TN Oct 2025 - Jan 2026

*Software Developer Intern*

- Engineered a full-stack automation tool to synchronize visit records for a home care facility with state verification systems, reducing a 20-hour manual process to under 5 minutes.
- Achieved a 70% reduction in data entry discrepancies by implementing robust API endpoints and validation logic.

**Amazon Web Services**, Bellevue, WA May 2024 - Aug 2024

*Software Developer Intern*

- Implemented an LLM-powered unit test generator to automate code coverage improvements for Python packages.
- Increased test coverage for 3 Python packages with >5% improvements in individual file coverage

**Amazon Web Services**, New York, NY May 2023 - Aug 2023

*Software Developer Intern*

- Implemented an automation tool to streamline ticket investigation workflows and serve as a reusable model for other teams

**Amazon Web Services**, Seattle, WA May 2022 - Aug 2022

*Software Developer Intern*

- Built a full-stack web application to reduce on-call engineer ticket investigation time by 20%
- Aggregated and summarized log stack traces to help engineers quickly identify system faults, user errors, and latency issues

## PROJECTS

### Revise

- Python tool leveraging large language models to generate structured study notes from raw text
- Converted generated notes from Markdown to PDF using LaTeX libraries for distribution

### Image Classifier

- Developed an image classifier for the New York Botanical Garden using transfer learning with InceptionV3.
- Achieved a 0.9713 competition score through careful data preprocessing and model fine-tuning.

### Mediscan

- Developed a user-friendly interface in Kotlin to summarize complex pharmaceutical information sheets for Eli Lilly medicines

### Page Calculator

- Automated A6-to-A4 booklet formatting, reducing paper consumption by 75%

## LEADERSHIP & COMMUNITY INVOLVEMENT

Co-Founder, Heart of Love Foundation; Career Services Ambassador; Stanford D.School University Innovation Fellow '23

## HONORS AND AWARDS

- 3X President's List, 3X Dean's List, USAID IDEA Case Competition (2nd Place), HBCU-FI Spring '25 Competition (2nd Place), Target HBCU Hackathon '22 (1st Place), Robinhood Hackathon (3rd Place)
